

Information for

Implant Manufacturers

Your templates available to customers worldwide

mediCAD[®]
The Orthopedic Solution
www.mediCAD.eu

Digital surgical planning and qualified dimensioning are the basis for a successful and efficient supply of implants. mediCAD® is a powerful planning and templating tool used by surgeons worldwide with its success closely tied to the trusted partnership of the implant manufacturers.

Let's work together on digitization in the clinics

Implant data maintenance at its highest level

- You provide us with your templates for integration into mediCAD® (2D and 3D).
- We take care of making sure the customer has access to your latest implant data in our software.

Sales partnership

- Become a gold or silver partner and distribute mediCAD® on your own or refer us to your customers.
- We offer our partners technical support, training of your sales team and joint marketing activities.

Save on logistics costs

- Save logistics costs on commissioned goods and work with your customers via digital connection through mediCAD®.

Customized implants

- Plan your patient-specific prostheses directly through the customer's DICOM data.
- We provide you with our planning software mediCAD® 3D free of charge including the appropriate interface for your design software.

PSI function

- PSI directly in mediCAD® - not a vision but concrete project.
- Dialogue with us to articulate your ideas and wishes.

3D-Printing

- Have anatomical regions created as a 3D printing model. Can be ordered directly through mediCAD® and available in two different materials.
- Benefit from a real preoperative view of the regions to be operated on.

mediCAD® - The partner of implant manufacturers

The advantages are obvious

- ✓ **Digital availability of your implants in more than 3,500 medical clinics, worldwide**
Every clinic and every doctor who already works with mediCAD®, can immediately use your implants for their digital preoperative planning.
- ✓ **Free delivery of the latest version with your digital implant data being integrated**
You will receive a complete version of mediCAD® to give to your customers with your implants presented in an extra favorites list. Your customers may use the software free of charge for a 90-day trial.
- ✓ **Long-term customer loyalty and new customer acquisition**
Tie your customers to your product in the long-term - we support you. For special user trainings and mediCAD® presentations, we will make sure to only highlight your implants.
- ✓ **Largest implant database in the world**
mediCAD® has the world's largest implant database with around 500,000 templates from over 130 international implant manufacturers. The database is updated and expanded monthly.
- ✓ **Future-oriented cloud-based planning with mediCAD® Web**
Client-server or cloud-based, your implant data will always be safe and available within the complete product range of mediCAD®.
- ✓ **Certification and approval of mediCAD® as a medical device on all continents**
Whether it is DIN EN ISO, FDA or MDSAP, mediCAD® is recognized and approved as a medical device, worldwide. An overview of all our country-specific approvals and certificates are available on our website www.mediCAD.eu (Company → Quality → Regulatory Compliance / Approvals)

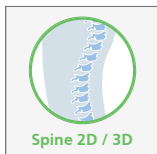

Contemporary doctors plan digitally, order directly and communicate electronically - with their implant manufacturer!

We look forward to partnering with your company!
